

MAINTENANCE INSTRUCTION FOR SINKS

DEAR CUSTOMERS,

We would like to thank you for purchasing our product. For the highest quality of our goods and services we recommend to follow our advices concerning use of purchased sink.

PLEASE NOTICE THAT BOUGHT SINK IS

COVERED BY 18-YEARS OF WARRANTY.*

HOW TO USE:

The sink meets the functional requirements in accordance with EN-13310

1. We do not recommend to place hot pots, pans and other items directly on the sink surface (please remember that bottom of the pan can be heated up to 500C) – they can cause serious damages on the product surface.
2. Heated items must be placed on special tray made from wood or plastic, dedicated for these types of products.
3. Never, for any reason do not use sink surface as a place for cutting vegetables or other products.
4. For cleaning we do not recommend to use bleach or any cleaning agents containing bleach or abrasives. It is not advisable to use wire brush or wire sponge – it can create scratches, stains or other damages on the sink
5. Cast heavy items into sink can cause a serious damages of the product

Attention! Please be aware that cleaning of the product by chemical unblocking of pipes liquids, cleaning tablets, descalers or other chemical agents can cause irreversible damages of the product.

HOW TO CLEAN:

1. We advise to clean the product each time, after use. For cleaning of the sink we recommend – warm water, regular dishwashing liquid and soft cloth.

2. Please be aware that during daily cleaning of the product, on the sink surface (especially on the bottom of the sink) may arise calcium deposits. In that case to remove calcium deposits we recommend to make precise cleaning of the sink (2 times in the week) using special liquid. After cleaning, we advise to rinse with plenty of water and wipe the product to dry. If it's necessary we recommend to repeat above action.
3. In case calcium deposits are visible we recommend to check water composition in the apartment. Limescale level should be according to Your country norms.
4. ATTENTION! In order to keep the product in proper condition and to protect sink against dirt, we advise to lubricate the product by edible oil at least one time in a week.
5. For cleaning we advise to use special Deante cleaning liquids for sinks.

ATTENTION!

1. In composite sinks, a bend of up to 3 mm is admissible, which is levelled, if assembled properly. Bending and thickness changes are the result of the technological process and have no impact on the strength and performance of the product.
2. For a built-in product, the Purchaser should check its proper operation before installation in the presence of the person supervising the operation of the product.
3. The Warrantor reserves the right to make production changes and corrections of the product arising from technological progress and aesthetic values without prior notice.
4. The manufacturer declares that the colour (shade) of a product from the same line may be slightly different and is in a similar shade. The difference in shade is not a defect of the product and may result from the normal production process.
