Ceramic washbasins in basic colours

4 colours, 1 style – refine your bathroom down
to the last detail

Why choose original RAVAK ceramics, made in Europe?

- **European manufacturing** – You support the region where we live, work, and raise our families.
- **No warehousing burden** – Thanks to flexible logistics, you get exactly what you need, when you need it.
- **Quality we stand behind** – 5-year warranty.
- **Long-term manufacturer service** – Spare parts available today, in 10 years, and even in 20 years.
- **Original, in-house design** – Sophisticated shapes, recessed waste plugs, and a fundamentally non-mass-produced product that competitors do not easily copy. Added value you can profit from.
- **Market-driven production** – Small batches tailored precisely to demand.
- **Wide range of available colours** – Including custom shades on request.
- **Tested performance parameters** – Washbasins with a load capacity of at least 150 kg, toilets up to 400 kg.
- **Branded mounting hardware** – Included with the product and in the price (e.g. Fischer).
- **Celebrations guaranteed** – Of our shared successes.

Thin-walled ceramic washbasins in basic colours

- For the production of thin-walled ceramic washbasins, we use the innovative material Ravak Ceram+, which takes ceramic manufacturing to the next level.
- The Ravak Ceram+ mixture allows designers to experiment with traditional shapes, enabling the creation of original designs and objects with exceptionally thin walls.
- Thin-walled ceramic products are lighter yet, thanks to the quality of the ceramic blend, also stronger. Their production uses fewer raw materials and less energy, resulting in a more environmentally friendly impact.
