Fixing A Washbasin To The Wall

Installation Guide

Fixing A Washbasin To The Wall

Pre Installation Notes

This product is to be fitted by a qualified professional.

Wall Hung units must be secured back to the wall using the wall hanging brackets or suitable wall fixings when not supplied.

Tools Required

Pencil

Tape Measure

Power Drill

Spirit Level

Step One

Use a pencil to mark the desired fixing location, using the holes in the washbasin as a guide.

Step Two

Check wall plug dimension and use corresponding bit size to drill as required, ensure the basin is true using the spirit level before drilling.

Note: Before drilling, ensure there are no hidden cables or pipes in the wall.

Step Three

Insert plugs into both holes.
Fix bolts into plugs.

Step Four

Hold the basin up to bolts and fit the nylon spacer and tighten nut.

Note: On some fixings the nut maybe incorporated into the spacer.

Step Five

Secure basin to the wall.
